## PHILIPPINES.

Views of a Representative of the American Bible Society

#### AS TO THEIR PRESENT FITNESS

For Self Government-Many able men Among Filipinos, but he Doubts if they have Qualifications Essential in the Founders of a Republic. Would Have Been Monstrous to Have Left the Philippines to Themselves or Turned Them Back to

NEW YORK, Jan. 15.-The New York Bible Society has received a second report from the Rev. John R. Hykes, D D., whom in September last it commissioned to proceed to Manila, for the sake of preliminary inquiries about the possible openings there for the distribu-tion of the Holy Scriptures. He expresses the opinion that the Filipinos re not capable of self-government and eays:

"While there are doubtless many able men among the Filipinos, I am convinced that they do not have the qualifi-cations which are essential to the founders of a republic. I believe that if western influence were to be entirely withdrawn, civilization would spontancously die out in the Philippines. The mass of the people are ignorant in the extreme, and they will not be prepared for many years for self-government. It will be generations before their aspira-

for many years for self-government. It will he generations before their aspirations to become an independent commonwealth ought to be realized.

"I was introduced to Aguinaldo, but I did not mention the subject of missions. A friend of mine, who is in the confidence of Aguinaldo, promused to bring the matter before him, and let me know his views." I received a letter from him a few days ago, in which he says:
"According to promise I interviewed General Aguinaldo on the subject of a Bible depot here (in Manifa), and his answer was to the effect that personally he was in favor of it, but the question had been discussed in the cabinct, and they objected to the scheme Aguinaldo himself, has become a Protestant, and he assures me that a little later on, when things become more settled, that there will be no trouble about the Bible society sending an agent here to the telsands. I am sorry that I cannot ble society sending an agent here to the islands. I am sorry that I cannot send you a more favorable answer now, but I will not lose sight of the matter. would be monstrous to turn 'th

"It would be monstrous to turn" the Philippines back to Spain." It would be a great blunder to grant them Independence. In my judgment, the only proper thing for 'the United States' to do is to keep the whole archipelago, and give the people good government and religious liberty. Every Spanish friar ought to be banished from the islands. If not, there will be endless trouble. I ought to have said that the Jesuits were never accused of the gross immorality with iccused of the gross immorality accused of the gross immorality with which the other orders have been so treely chiraced. They were driven out of the provinces by the other religious corporations, and their work was al-most entirely confined to Manila. There is a priest here in Shanghal who was in Manila for many years, and he does not hesitate to say that the lives of the Spanish friars were scandalously cor-rupt.

Tupt.

Tknow that the opinion has been expressed in the United States, that there is no need for the Protestant churches to excert themselves about the Philippines; that the Roman Catholic church pines; that the Roman Catholic church has taken good care of the people for more than three hundred years: that they are good, 'intelligent Catholics, who cusht not to be, disturbed in religious matters, and that we have nothing better to offer them than what they already, have. No man who has been to the Philippines could honeatly hold such opinions for a moment. No man who is familiar with the history of the church in the Philippines could have the audactly to give publicity to such statements.

"The people have been kent, in lenorance, because the priests could thus
best play upon their superstitions,
Schools authorized by the Snanish government were not established because it
did not suit the priests to have them.
They have nothing but the outward
form of religion, and know nothing of
its inward and spiritual grace. Roman
Catholicism has not purified their lives.
It has not been a power in modding and
transforming their characters. Plous
and devoit Catholics would be scarcely
ready to eknowledge them Catholics
in more than name, and I think would
admit that they are fit subjects for misslons of their own church. The masses
of the people are painfully ignorant in

admit that they are fit subjects for missions of their own church. The masses of the people are painfully ignorant in religibule matters. I think it would be difficult to find a more needy field, and the call that comes to the Protestant churches of America is loud and urgent. The people are and have been without the Bible. They, know there is such a book, and that is about all.

"Under Spanish rule it was impossible for the Bible societies to \$\textit{loany}\$ and work in the Phillipplnes.
"I desire to impress upon the managers of the society the importance of entering this field at the very earliest opportunity. If there shall be any postbilly of deing Bible work in the Phillipplnes it will be because they have become American soil, and the first and strongest obligation rests upon "the American Bible Society to undertake it. "General Otis very kindly told me that if we want to take Chinese colporteurs to the Islands to sell Scriptures among the Chinese, he will give them appeals permission to land upon my making application to him.

"American missionaries are beginning to go to the islands. To-day the Rev. C. A. Owens and wife, the first missionaries of the Methodist Episcopal church to the Phillippines, arrived, curoute to Manila. As soon as these missionaries get the language they will translate the Scriptures into the native dialects, and it will be the work of the American Bible Society to publish them. What a field there is for this will be understood when I tell you that there are more than thirty distinct languages recognized in the Phillippines."

## COOLIES FOR MEXICO.

Chinese Residents Say They Have Been Sold Into Slavery.

VANCOUVER, B. C., Jan. 15. - The steamship Empress of Japan, from Hong Kong, brought 408 Asiatic steerage passengers, many of whom were low caste Chinese coolies. One hundred and ninety-one of the men were destined for Tampico, Mexico. It is stated that they have been engaged under contract to work on plantations and on railway construction by men known as Ma-Gulen and Ma Luke, both of Hong Kong, for one Ma Gop, of Mexico. According to the statement of Vancouver Chinamen their wages are to be sent to their families in China through Ma Luke and Ma Gulen, and they are to be permitted to return to China after two years of work. It is stated that Ma Gop is arranging to import 1,300 of these coolles from Hong Kong.

While the first contingent for Mexico were being loaded into a special train of coaches which were lined up along the steamer dock, some San Francisco Chinese residents of this city created a panic among the newly arrived countrymen by telling them they had been sold into slavery and would never be permitted to return to the Orient. A stamped compediately followed and the officials were obliged to resort to violence in order to check the rush of the men which was in the direction of the water. that they have been engaged under con-

score of them were knocked down

A score of them were knocked down with clubs and the crowd was only stopped in time to prevent it plunging over the docks.

A number of the Celestials got away from the officials and were secreted in and about Vancouver. Searching parties were started out in pursuit of them and it was not until to-night that the last were corraled.

The Chinese here are circulating a story that the men have been sold at sums ranging from \$500 to \$1,000, and that they will never be permitted to return to China.

#### WRECKEDBY SNOW HABIT.

The Awful Fate of a Man who Turned

from Whiskey to "The Beautiful. Cleveland Plain Dealer: Every great discovery in the world's history has brought with it an accompanying atfliction, and it has remained for the Klondike to develop a peculiar mania that threatens to outrival oplum eat-Among the residents, of the north it is known as the "snow habit,"

ing. Among the residents of the far north it is known as the "snow habit," and it is said to be incurable. Henry Barnum, of Great Bend township, has returned from the Klondike, and tells the strange story.

There are many strange things in the Klondike," said Mr. Barnum, "but perhaps the strangest and that about which nothing has been written so far is the dissipation caused by eating snow. In the north, when the thermomiter reached thicty to forty degrees below zero, a mouthful of snow is like moiten inetal. It brings an inflammation to the palate and tongue, and it is impossible to quench the thirst. The first advice an old-timer offers a new-comer in the region is, "Don't cat snow." There are men in that country, once hearty, robust miners, now weak, effeminate creatures, whose fail can be traced directly to the time they began munching snow.

"The matter has been but little investigated, but the scientists who have examined the subject say that the waters of the north are rich with mineral deposits, which are being constantly washed down from the mountains. A certain per cent, of this mineral is taken into the air when vapor arises and the snow heave been several falls of red snow heave been several falls of red snow heave here several falls of red snow near Point Barrow, the deposits being of a reddish brown polor, due entirely to uninerals. Thus it can be seen that a person eating large quantities of the snow takes into his system a corresponding amount of minerals.

While coming down the Copper river last spring Mr. Barnum came upon a party of miners where one was dying from the effects of eating snow. He had been a hard drinker, but had-run short of whisky. His thirst became uncadurable, and as water was scarce in midwinier he had taken to eathng snow.

cadurable, and as water was scarce in midwinter he had taken do enting snow. Soon he claimed it relieved his appetite for the liquor, but his companions noticed that his appetite for snow increased until he was consuming enormous quantities, Gradually his skin, which was a dark bronze, Srew light, his rugged stature became hent, and even his harsh voice changed to the effeminate squeak of an old woman. His strength gave way and his companions tried to break him of the habit. He would lie on his pallet and moan pittfully for a mouthful of snow, and when opportunity afforded he would steal unobserved to the deorway and gulp down huge handfulls. At last, seeing death was inevitable, his companions allowed him the snow, hoping to prolong his life. It proved unavailing, and one morning just previous to Mr. Barnum's departure the man was found dead.

There are some spots on the Copper river where the snow, whom metal early

departure the man was found dead.
There are some spots on the Copper river where the snow, when melted and strained through a cloth, shows perceptible signs of minerals, and often gold is found pientifully intermixed, but of course not in paying quantities. Where this comes from is a mystery, but it may be brought from the far north by the heavy winter gales that sweep over this part of the country. It has been said that if the snow could be melted away it would leave deposits of millions of dollars in gold dust on the ground.

millions of dollars in gold dust on the ground.

Mr. Barnum had a close call himself from being a victim to the snow habit, "It was in the winter of 1895-97," he said, "and I was new to the country, An old miner near Dawson had warned me against snow eating, but I, with my partner, had gone back in the hills on a prospecting tour and had got caught, in a blizzard. We were shy of provisions and on the way up lost the packpartner, had gone back in the hills on a prospecting tour and had got caught, in a bilizzard. We were shy of, provisions and on the way up lost the package containing our cooking mensils. This we remedied by profiling our cooked foods, but we had nothing in which to melt the snow. It is claimed that meltical snow is harmless, as the metallic deposits it contains sink to the bottom of the receptacle. We decided to try it raw, and we did, Whether it was the food or the snow I don't know, but during the week we waited for a chance to get out we had an ever-increasing thirst, until, when we were finally able to strike the trail, we were consuming snow at a rapid rate. When we reached our companions we attempted to assauge our thirst with water, but it did no good. We had acquired a taste for the frozen water and it seemed to have invigorating qualities. At night, we could not sleep until we took our snow. We were fast approaching the degenerate stage, when I rached a realizing sense of our condition and undertook to break it off. I began by degrees and worked down, but up to the very moment I left the country the sight of snow always raised in me an inordinate craving. It cost me many sleepless nights and weary days to restrain myself. Had I given away to the habit I would, like many another poor fellow, have lost all ambition and sinderness."

The week opened with transactions again reaching the million share mark, resulting in irregular net changes, loss prevailing. London, it was estimated, sold altogether 75,000 shares here, nearly half of that amount in the first quarter of an hour. There was no news market-wise of any importance. Standard stocks were in heavy demand in the forenoon, all the Grangers making new records for high prices. The evidence of support to leading stocks was followed by bursts of strength elsewhere, after periods of hesitancy in the early dealings. There was a rise in Federal Steel on the continued good demand for Iron products, but the advantage gained was not fully retained. Among other specialties where renewed interest was displayed were mand for iron products, but the advantage gained was not fully retained. Among other specialties where renewed interest was displayed were Metropolitan, Consolidated Gas, Leather preferred and American Steel, while Air Brake made a sensational advance weak all day. The Pacific stocks were weak all day. The heavy London selling was of assistance to many board room traders in bringing about a reaction in the final dealings, although there was an increase of buying instead of selling orders brought into the market. It was in the last half hour that practically all of the earlier gains in the market were lost, and in a number of shares the prices were carried sharply below Saturday's close, especially Union Pacific, Northern Pacific, Louisville, Manhattan, Southern preferred, Omaha, Kansas & Texas preferred, Ornaha, Kansas & Texas preferred, Previously the market had been rather quiet on declines, but the greatest activity to-day was toward the colors, when prices ran of Among the coalers. tivity to-day was toward the close, when prices ran off. Breadstuffs and Provisions.

CHICAGO-Both sides found encouragement in to-day's wheat news, but the bulls finally gained control of the market and after many vicissitudes May closed at 14@4c advance. Corn left off Matte higher, and oats unchanged. Pork and ribs gained 25c each, and lard

A heavy shrinkage in the output from Russian and Danubian ports for last week started wheat strong. May opened 46% higher at 17% 671½, and met with such heavy coverings by shorts together with buying for the long account that in a few minutes the price reached 71%. The next matter to receive attention was the present of co. reached 71%c. The next matter to receive attention was the prospect of an increase in the visible supply, indications of which began to appear as the result of stock-taking at the various centers was made known. It looked at one time as if the increase would amount to 1,000,000 bushels, and on that probability May gradually sold down to 70%c. As the increase proved to be but 577,000 bushels, a shade of confidence again commenced to diffuse itself throughout the pit, and May was bid up to 71%-671½c. Chicago received 220 cars, of which

throughout the pit, and May was one up to 11%@11%e.

Chicago received 220 cars, of which 14 graded contract. Minneapolis and Duluth receipts were 782 cars, against 525 the corresponding day of last year. The quantity affect for Europe was reduced 1,644,600 bushels since Monday. Argentine advices were of an exportable surplus of 55,000,600 bushels of wheat of good quality, and as the aggregate of wheat at western primary markets amounted to 917,000 bushels against 522, 600 bushels a year ago, the bears had an inning and May was forced down to 70%@70%c. This was under under puts and immediately started buying by holders of those privileges, and with the help of a few outside busing orders May gradually worked up to 71%c, with many changes between 71c sellers and 71%c bid. The cash demand here was slow and the Atlantic port clearances of wheat and flour were placed at 475,000 bushels. Liverpool and the continental markets closed strong in the face of an increase in the English visible supply of 1,691,600 bushels. Toward the end longs showed a desire to increase their holdings, and as shorts were anxious to obliterate their record May was bid up to 711%f1%c and remained at that figure until the close. The stiength in wheat and receipts away below estimates started corn firm. The advance, however, met with heavy selling by a prominent shipping concern, and the market soon turned weak. Local stocks showed an increase of 934,000 bushels for the week, and the visible supply increased 2,427,600 bushels. Receipts were 958 cars. Chicago received 220 cars, of which 4 graded contract. Minneapolis and

958 cars. Scattered buying gradually developed Scattered buying gradually developed a steady feeling, and in the last fifteen minutes the market became very strong and touched the highest price made near the start. May opened 4c higher at 374c, declined to 36%c, and after being at 37c sellers most of the day it suddenly shot up to 374c and closed at 374,6374c.

suddenly shot up to 374c and closed at 3746274c.
Oats started firm with the other grains. Prices eased off for a while en heavy selling, but when the offerings were finally absorbed the market turned strong and closed near the top for the day. Receipts were large—350 cars. May opened the higher at 275628c, declined to 274c, then firmed up to 274c275c, the closing price.

Provisions opened strong, but there was considerably more for sale than appeared to be wanted for a while, and prices declined to a tritle below Saturday's level. Near the end of the session the publication of last week's shipments of meats were so heavy as to induce enough buying to cause a rails all around. May pork opened be higher at \$10.20, rose to \$10.224c, declined to \$10.0715c.

then recovered to \$10.17½ at the close. The range is lard and ribs was small. Bestimated receips for Tucaday: Wheat, 110 cars; cotn, 700 cars; cats, 100 cars; logs, 32,000 had.
The leading futures ranged as follows:

## Metals.

Metals.

NEW YORK—The weak opens with the metal market showing great strength in nearly all departments. The features of to-day's market was a further rise from 15 to 25 points in copper, due to buillish reports from the west and abroad and a withdrawal of scilers. Lead, spelter and iron followed the improvement on a smaller scale. The was firm, but without change. Many rumors were in circulation as to the cause of firm, but without change. Many rumors were in circulation as to the cause of the relative hesitation in tin, this metal having shown remarkable and even sensational twens that. At the close the metal exchange called pig iron warrants firm at \$3 25 nominal; lake copper strong and higher at \$14 00 bid and \$14 50 asked; tin firm at \$21 75 bid and \$4 17½ asked. Spelter firmer at \$5 300 bid and \$5 40 asked. The brokers' price on lead to-day was \$3 924. ers' price on lead to-day was \$3 9214 and copper \$14 15.

## Dry Goods.

NEW YORK—The week opens quiet-ly in the dry goods market so far as spot business is concerned, but mail orders for all descriptions of cotton goods have been of fair volume. Prints are very firm.
